Professional Summary

Results-driven Full Stack Engineer with over 6 years of experience in designing, developing, and deploying robust applications in Agile environments. Known for expertise in Java/J2EE, JavaScript, NodeJS, Liferay, and CI/CD processes, with a strong focus on process efficiency, technical excellence, and collaboration. Passionate about leveraging technology to deliver impactful solutions that support organizational goals and enhance user experiences.

Core Competencies

- **Programming & Development:** Java/J2EE, JavaScript, NodeJS, SQL (MySQL), C++
 - **Frameworks & Tools:** Liferay, Spring, Git, Selenium, Eclipse
 - **DevOps & CI/CD:** Docker, Jenkins, API Integration, End-to-End Automation Testing
 - **Methodologies:** Agile (Scrum), Unix Systems
 - **Soft Skills:** Team Collaboration, Problem Solving, Analytical Thinking, Attention to Detail
-

Professional Experience

London Borough of Camden

Full Stack Engineer

August 2018 – November 2022

London, Greater London, United Kingdom

- Developed and maintained core applications for Camden Council, improving processes for residents and internal users through a user-centered approach.

- Utilized expertise in server-side JavaScript using Node.js to build responsive and robust application backends.
- Collaborated within an Agile Scrum team to ensure consistent, high-quality deployments through CI/CD pipelines and automated testing. Collaborated with cross-functional teams to design, deploy, and managed application architectures tailored to client needs.
- Built and optimized APIs to streamline integrations across systems, supporting complex workflows and enhancing functionality.
- Conducted rigorous end-to-end testing using automation, increasing software reliability and deployment speed.
- Leveraged Docker for containerized deployments, simplifying the deployment and maintenance of applications.

Tata Consultancy Services

Software Engineer

December 2014 – August 2017

Mumbai, India

- Played a key role in the development of the TCS Bancs product, with contributions to both front-end Bancs channels and middleware components.
 - Developed in Java/J2EE, using Struts, Spring, and Hibernate frameworks to create efficient, reliable software solutions.
 - Worked extensively in Unix environments, applying C++ and MySQL to improve backend performance and database operations.
-

Education

Andhra University

Bachelor's Degree in Information Technology 2010 – 2014
